

Faster, safer **INSPECTIONS** with Autel EVO II™ PRO

Fly with confidence in any environment* with the Autel EVO II™ Pro aircraft. The industry's most advanced Omni-directional Obstacle Avoidance system with 12 sensors enables pilots to fly with a confident, safe standoff from structures, offering reliable, stable hover regardless of obstacles in up to Level 8 winds (46Mph). The 3X lossless zoom captures sharp images when obstacles do not allow close flight.

Autel EVO™ II Pro is THE solution!

- Best-in-class OmniDirectional Obstacle Avoidance Technology®
- Autonomous search grid-capable for rapid, accurate scene capture
- Compatible with all 3D Imaging software for accident reconstruction
- Camera system with live view on remote or send to command monitors via Autel LiveDeck™
- Interchangeable sensors
- Safely flies in high wind, urban environments with stability
- Airborne in under 40 seconds
